Overview

- Enjoy room-filling sound from this great little AM/FM radio. Tune in your favorite stations using the oversize, easy to read tuning dial.
- The telescopic antenna allows you to draw in hard to receive stations.
- The headphone output jack will allow for private listening.
- The AUX input jack allows you to connect your other audio devices such as MP3 players.

Quick Start Steps

1. Carefully unpack the radio and AC power cord. Plug the power cord into the radio and to an AC wall outlet.
2. Turn the radio on by using the Volume control On/Off switch.
3. Select AM or FM band radio stations with the band selection dial.
4. Tune in your favorite station by rotating the oversize tuning dial.

2	Earplug / Headphone output jack
3	AUX input jack
4	AC Power Cord Socket

Operating Instructions

1. Connect the AC power cord to the Radio power input as located on the back of the unit. Then plug the AC cord into a standard AC wall outlet.
2. To turn the radio on, Turn the Volume ON/OFF switch clockwise to the right. The Green power indicator light will come on.
3. Set the radio band selection switch to AM or FM radio.
4. Extend the FM antenna to it's full length for best FM reception.
5. Rotate the oversize tuning dial to locate your favorite radio station. The green LED light will come on when the radio station is set at it's optimum receiving strength.
6. You may rotate the FM antenna to the right or left in order to pick up hard to receive stations.
7. The AM antenna is located inside the radio. You may change the position of the radio to help receive distant AM broadcast stations.
8. AUX IN---you may connect other audio sources (Cassette, CD, MP3) to play through the radio speaker by connecting them to the radio using the 3.5mm phono jack cable input located in the back of the unit. NOTE; only the volume control will be operable while you have the Aux Input in use. You must remove the input cable to resume normal Radio listening.
9. To turn OFF the radio, turn the volume control counterclockwise until you hear the "click" sound indicating the power is turned off.
10. HEADPHONES or earbuds may be used to listen privately to the radio by plugging them into the Headphone output jack located in the back of the radio.

Specifications

Power Source:	AC 120V-60Hz
Frequency Range	FM-88-108Mhz AM-530-1710Khz
Power Output	2 Watts

Important Safety Instructions

- To reduce the risk of electric shock or product damage, do not attempt to remove screws (of product cover).
- Do not use this unit near the presence of water. Do not expose this unit to rain, moisture, water drip or splash. Also ensure that no container with liquids, such as vases, be placed near or on the unit.
- Do not operate or install near any heat sources such as radiators, heat registers, stoves, or similar unit.
- Do not open product cover and do not attempt to repair this product by yourself. Please refer to qualified service personnel.
- Please insert the AC plug and secure it firmly to avoid any electrostatic discharge.
- Ensure all cords are connected, safely and correctly.
- Avoid Exposure to direct sunlight, Clean with a dry, soft cloth only.
- Do not allow metallic objects to come into contact with the AC/DC plug when the machine is in operation.
- Avoid placement near hot equipment such as amplifiers, to prevent the product from overheating.
- The contents of this operation manual may be updated from time to time to incorporate updated functionalities.
- Lightning and Power Surge Protection---Unplug the unit from the wall outlet during a lightning storm. This will prevent damage to the unit.
- The item is not a toy. Keep out of the reach of children.
- Using headphones at high volumes can damage hearing.
- Do not place the radio in close proximity to other magnetized objects such as tapes, CD's televisions, or speakers as these may cause disturbance to the radio station reception.
