USER'S GUIDE

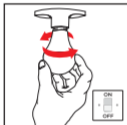

Color Changing

LED Bulb

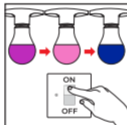

Welcome to your new *color-changing* LED light bulb!

QUICK GUIDE:

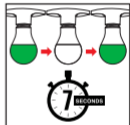

This color-changing LED light bulb features an automatic color-changing mode and 16 color options. Cycle through each color mode by turning the light switch on, off, and back on again.

To begin, ensure the light switch is turned off and screw in the light bulb.

Next, turn the light switch on. To change color modes, simply turn the light off and immediately back on again. Continue doing this until a desired light mode is illuminated.

Built-In Memory: If the light bulb is turned off for more than 7 seconds, the same color light mode will illuminate the next time the bulb is turned back on.

SPECIFICATIONS:
