

Light Mix[®]

Sound Responsive STRING LIGHTS

User Manual

Indoor Use Only

LET THE LIGHT SHOW BEGIN!

Incorporating the latest DSP Technology,
LIGHT MIX LED String Lights pulse and
blink to the beat of your music.

In Sound Responsive Light Show mode, the LED lights respond in perfect synchronization to surrounding sound.

Beat detection is achieved by the Light Mix chip, which uses Digital Signal Processing (DSP) technologies to analyze the frequency and amplitude of music.

This technology is very sensitive to low frequency sounds – creating a “Light Show” that is totally unique to the beat of your music.

Combined with a high quality built-in microphone, the string lights detect a dynamic range of sounds from 65db to 110dB.

CAUTION:

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

TURNING ON AND OFF

Press and hold for 2 seconds to turn on the unit

Press and hold for 2 seconds to turn off the unit.

AUTO ON/OFF TIMER

There is a built-in timer of 6 hours. The unit will automatically turn off after shining for approximately 6 hours and on again after 18 hours.

CHANGING MODES

When turned on, the default mode is Sound Responsive Light Show.

Cycle through each mode by clicking the on/off button until the desired light mode is achieved.

- Light Show (responds to music)
- Steady On
- Slow Pulse

TIP: To go quickly to Sound Responsive mode, turn the unit off and on again.

BATTERY

- Uses 3 AA batteries (not included).
- Replace batteries regularly to maintain brightness.
- Do not mix old and new batteries. Do not mix alkaline, standard (Carbon-Zinc) or rechargeable (Nickel-Cadmium) batteries. Do not dispose in fire.
- When not used or in storage, remove the batteries from the unit.
- Dispose of old batteries according to your local regulation.

Item No.: XNL-1144B

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) This device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to

correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
